Reporting MDT logs

A method is used in a mobile communication device in a service network comprising a plurality of cells. The method comprises transmitting, by the mobile communication device, an MDT log to the service network via a serving cell upon receiving a request message for the MDT log; and terminating (finishing, stopping, releasing, suspending or ending), by the mobile communication device, the transmission of the MDT log in response to a change (e.g. handover, relocation, reselection, cell update, etc.) of the serving cell from a first cell to a second cell in the service network. In a second embodiment, parts of the MDT log are sent in several report messages until the whole MDT log is reported to the network. Thereafter, the MDT log is removed or deleted from the user equipment, UE, memory.

The present search report has been drawn up for all claims.

Place of search: Munich  
Date of completion of the search: 30 November 2011  
Examiner: Moreno-Solana, S
### CLAIMS INCURRING FEES

The present European patent application comprised at the time of filing claims for which payment was due.

- □ Only part of the claims have been paid within the prescribed time limit. The present European search report has been drawn up for those claims for which no payment was due and for those claims for which claims fees have been paid, namely claim(s):

- □ No claims fees have been paid within the prescribed time limit. The present European search report has been drawn up for those claims for which no payment was due.

### LACK OF UNITY OF INVENTION

The Search Division considers that the present European patent application does not comply with the requirements of unity of invention and relates to several inventions or groups of inventions, namely:

see sheet B

- ☑ All further search fees have been paid within the fixed time limit. The present European search report has been drawn up for all claims.

- □ As all searchable claims could be searched without effort justifying an additional fee, the Search Division did not invite payment of any additional fee.

- □ Only part of the further search fees have been paid within the fixed time limit. The present European search report has been drawn up for those parts of the European patent application which relate to the inventions in respect of which search fees have been paid, namely claims:

- □ None of the further search fees have been paid within the fixed time limit. The present European search report has been drawn up for those parts of the European patent application which relate to the invention first mentioned in the claims, namely claims:

- □ The present supplementary European search report has been drawn up for those parts of the European patent application which relate to the invention first mentioned in the claims (Rule 164 (1) EPC).
The Search Division considers that the present European patent application does not comply with the requirements of unity of invention and relates to several inventions or groups of inventions, namely:

1. claims: 1-6
   Terminating a transmission of minimization of drive test, MDT, logs in response to a change of serving cell.
   ---

2. claims: 7-15
   Transmitting a response message comprising part of a minimization of drive test, MDT, log, and indicating whether at least one more part is available for reporting (claim 7).
   Transmitting at least two messages each comprising part of a minimization of drive test, MDT, log (claim 15).
   ---
This annex lists the patent family members relating to the patent documents cited in the above-mentioned European search report. The members are as contained in the European Patent Office EDP file on the European Patent Office is in no way liable for these particulars which are merely given for the purpose of information.
