A flying action figure may include an airframe, which may include a body and at least one wing. The body may be configured into a humanoid shape. The flying action figure may include at least one propulsion unit, which may be mounted to the airframe. The at least one propulsion unit may be operable to propel the flying action figure. The flying action figure may include at least one energy source, which may be mounted to the airframe. The flying action figure may include a controller, which may be mounted to the airframe. The controller may couple the at least one energy source to one or more of the at least one propulsion unit. The controller may be configured to control operation of one or more of the at least one propulsion unit to control flight of the flying action figure.
INTERNATIONAL SEARCH REPORT

A. CLASSIFICATION OF SUBJECT MATTER
IPC: A63H 27/00( 2006.01)
USPC: 446/34,57,61

According to International Patent Classification (IPC) or to both national classification and IPC

B. FIELDS SEARCHED
Minimum documentation searched (classification system followed by classification symbols)
U.S. : 446/34,57,61

Documentation searched other than minimum documentation to the extent that such documents are included in the fields searched

Electronic data base consulted during the international search (name of data base and, where practicable, search terms used)

C. DOCUMENTS CONSIDERED TO BE RELEVANT
