A flying toy includes a doll support housing which receives and supports a doll. The housing further supports a plurality of flexible radially extending resiliently mounted wing struts having fabric segments coupled therebetween to form wings. A launcher includes a cup-like receptacle which receives the flying toy and which receives and confines the wing struts and wing structure in a folded configuration. A latchable release maintains the flying toy in its receptacle until the toy is rapidly moved and the latch is released. Thereafter, the toy leaves the receptacle and the wings flex outwardly to produce a glider toy.

### INTERNATIONAL SEARCH REPORT

**A**  CLASSIFICATION OF SUBJECT MATTER

IPC: A63H 1100(2006 01)

USPC: 446/3 10

According to International Patent Classification (IPC) or to both national classification and IPC

**B.**  FIELDS SEARCHED

Minimum documentation searched (classification system followed by classification symbols)

U.S.: 446/308-3 12,268

Documentation searched other than minimum documentation to the extent that such documents are included in the fields searched

Electronic data base consulted during the international search (name of data base and, where practicable, search terms used)

**C.**  DOCUMENTS CONSIDERED TO BE RELEVANT

Further documents are listed in the continuation of Box C. See patent family annex.

- A: Special categories of cited documents
  - "A": document defining the general state of the art which is not considered to be of particular relevance
  - "E": earlier application or patent published on or after the international filing date
  - "L": document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)
  - O: document referring to an oral disclosure, use, exhibition or other means
  - P: document published prior to the international filing date but later than the priority date claimed
- "T": later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention
- "X": document of particular relevance, the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone
- "Y": document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art
- "K": document member of the same patent family
