WEARABLE VIBRATING MEANS AND THERMAL CONDITIONING THERAPEUTIC DEVICES

A wearable therapeutic device is disclosed. The device comprises a garment accessory for fitting on the body part to be treated, vibrating means and thermal conditioning means. At least one of the means is reversibly attachable to the garment accessory. Various embodiments and methods of achieving them are disclosed, including a fastenable disposable vibrating element administering a combination of treatments to a person, wherein the element is adapted to attach at least temporarily to a brace-like sleeve and/or brace-like garment accessory, the element having a plurality of attaching means. A garment accessory for the wearable therapeutic device; wherein at least one vibrating means and or heating means of the wearable therapeutic device is reversibly attachable to said garment accessory is disclosed and enabled herein.

Further documents are listed in the continuation of Box C.

* Special categories of cited documents:
  "A" document defining the general state of the art which is not considered to be of particular relevance
  "E" earlier application or patent but published on or after the international filing date
  "L" document which may throw doubts on priority claims or which is cited to establish the publication date of another citation or other special reason (as specified)
  "O" document referred to in an oral disclosure, use, exhibition or other means

"T" later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention

"X" document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone

"Y" document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art

"Z" document member of the same patent family
