A universal clamp for use on a crib and a method of securing the clamp to the crib. The clamp includes a first base and a second base removably coupled to a crib. The first base includes an aperture and is configured to receive a strap and a recess. The second base includes a shaft configured to be received within the recess of the first base, a spring coupled to the shaft and being biased to retain the shaft within the recess, and a cam buckle connected to and pivotable with respect to the second base. The second base is configured to rotate with respect to the first base, and the cam buckle is configured to receive the strap to secure the clamp to the crib.

(88) Date of publication of the international search report:
17 June 2010

— with international search report (Art. 21(3))
A. CLASSIFICATION OF SUBJECT MATTER

F16B 2/02(2006.01), F16B 2/08(2006.01)

According to International Patent Classification (IPC) or to both national classification and IPC

B. FIELDS SEARCHED

Minimum documentation searched (classification system followed by classification symbols)
IPC A47C 21/00, A47C9/04, F16B 1/00

Documentation searched other than minimum documentation to the extent that such documents are included in the fields searched

Electronic data base consulted during the international search (name of data base and, where practicable, search terms used)
eKOMPASS(KIPO internal) and keywords clamp, clip, crib, strap

* Special categories of cited documents
"A" document defining the general state of the art which is not considered to be of particular relevance
"E" earlier application or patent but published on or after the international filing date
"L" document which may throw doubts on priority claim(s) or which is cited to establish the publication date of citation or other special reason (as specified)
"O" document referring to an oral disclosure, use, exhibition or other means
"P" document published prior to the international filing date but later than the priority date claimed

"T" later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention
"X" document of particular relevance, the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone
"Y" document of particular relevance, the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art
"&" document member of the same patent family
